DETAILED ACTION

- 1) Acknowledgement is made of Amendment received 8/7/2006. Claims 1-16 are cancelled and new claims 17-18 are offered for consideration.
- 2) Claims 1-8 rejection under 35 U.S.C. 102(b) as being anticipated by Oechsle (DE 19956752), is withdrawn in view of cancelled claims.
- 3) Claims 9-16 rejection under 35 U.S.C. 103(a) as being unpatentable over Oechsle, with or without Weitzel (DE 9207656) and Sollinger (6,024,836), is withdrawn in view of cancelled claims.
- 4) Applicants' arguments with respect to claims 1-16 have been considered but are moot in view of cancelled claims.

Election/Restrictions

- 5) Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claim 17, drawn to a paper machine, classified in class 162, subclass 272.
 - II. Claim 18, drawn to a method of controlling web formation in a paper machine, classified in class 162, subclass 198.

The inventions are distinct, each from the other because of the following reasons:

Inventions II and I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another and materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP §

Art Unit: 1731

806.05(e)). In this case the apparatus can be used to practice another r and materially different process, for example, making tobacco sheets.

Because these inventions are independent or distinct for the reasons given above and have acquired a separate status in the art in view of their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To reserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Should applicant traverse on the ground that the inventions or species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the inventions or species to be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C.103(a) of the other invention.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
